

INTEGRITY MANAGEMENT *by NKT Flexibles*

NKT FLEXIBLES INTEGRITY MANAGEMENT

We help our Clients with a proactive safety strategy!

NKT Flexibles provide a number of professional services related to Integrity Management.

The NKT Flexibles philosophy is to assist our customers towards a safer and more efficient operation by providing the tools needed for a well planned integrity management program, including periodic test and inspection, embedded monitoring systems and thorough assessment of all data from flexible pipes in operation.

NKT Flexibles also offer services in the pre-project phase with design of feasible solutions based on our vast experience as manufacturer of flexible pipes combined with our in-house flexible pipe experts, extensive laboratory facilities, specialized software tools and experienced offshore personnel.

INTEGRITY MANAGEMENT by NKT Flexibles

ADVANTAGES of INTEGRITY MANAGEMENT

- *Increased Safety on platform by detection of potential failure prior to incident*
- *Reduced downtime and avoidance of unplanned shut downs by scheduled inspection*
- *Optimization of component lifetime by condition monitoring and maintenance*
- *Intelligent spare philosophy based upon actual component condition*

NKT Flexibles ensures that flexible pipe systems can be managed safely by focusing on Integrity Management during the entire operational life span of the flexible pipe system.
